

Central Mass. Mosquito Control Project

www.cmmcp.org

DATE: Sept. 7, 2011
SUBJECT: Extension of spray program
TO: CMMCP member Health Departments
FROM: Timothy Deschamps, Executive Director

The adult mosquito spray program has been extended into September due to higher than normal mosquito populations, nighttime temperatures over 50F, increased service calls in some areas, as well as sustained risk from mosquito-borne diseases. Enclosed is a schedule for the next two weeks; please note, the week of 9/19-9/23 is very tentative. Spraying that week will be subject to nighttime temperatures, as well as mosquito population numbers and service requests on file.

Surveillance and testing will continue this month, and if any mosquito viruses are detected in your area we will be in contact with your department to determine the appropriate response. We ask that you continue to spread the message to residents through your local newspaper and other public access systems about personal protection from mosquitoes using avoidance techniques and repellents, as well as emptying containers that hold water.
