Howdy,

I met with a contact at Camosse Masonry Supply from Charlton and Worcester and I believe that they are an excellent fit for providing “rustic” fence posts that they will make from recycled granite – AND they will predrill all of the rail mounting holes. I’m guessing that having the holes predrilled would be your recommendation Steve.

I have attached a copy of their quote and they will have me come “approve” the posts when they have cut them and before any holes are drilled, Since this is recycled granite, one face of each post will be smooth but that can be oriented to the inside of the common so it will not be visible to passersby.

Basically the order will be for the 14 posts that you called out (8 end posts and 6 center posts) and they will be 7 feet long and from 6 to 8 inches in width depending on the recycled source and holes drilled according the original template that I will provide to them. This will be a good visual fit with the existing fences.

A cost summary is that the fabricated posts will cost \$3,430, all of the holes will be drilled at a cost of \$400 and delivery to Stow will be \$175 – Grand total = \$4,005

Steve and Jesse, would whoever has the purchasing power please issue a purchase order and mail it to the supplier at the address on the attached quote and the name of the contact fellow that I am directly working with is Henry Camosse III. Please copy me when this is done.

Moving forward!

Thanks for the help that you have provided.

Phil
