1.0 Application, Checklist & Copy of Filing Fee

ZONING BOARD OF APPEALS

TOWN OF STOW

Karen Kelleher
Board of Appeals Secretary
kkelleher@stow-ma.gov
978-897-2784

Z.B.A MEETINGS ARE HELD THE FIRST MONDAY OF THE MONTH, EXCEPT IF DATE IS
A HOLIDAY.

SUBMITTALS ARE DUE THE MONTH PRIOR TO THE MEETING DATE.
THE FIRST TUESDAY BY NOON.

CHECK LIST FOR ZONING BOARD OF APPEALS SUBMITTALS

Application: Completed with all information required, including a description or narrative of the proposed project. (Separate applications when both a Special Permit and a Variance are requested.)

List of Abutters: Request for List of Abutters must be submitted to the Assessors' Office. The application is included in this package. *The applicant is to make copies of the list of abutters provided by the Assessors office and insert it in each packet: special permit = 13 and variance = 8*

Site plan prepared by engineer or land surveyor: If the application pertains to new construction or addition to an existing structure, the plan must show the location of the same with setbacks from the lot lines.

Plan/drawing of the proposed new construction with dimensions, square footage, elevations, height, etc.

Check for the fee made payable to Town of Stow:
Special Permit filing fee is \$150.00;
Variance filing fee is \$100.00;
plus \$6.00 for each abutter as listed by the Assessors.
Payment may be made with one check.

10 Copies Provided

For Special Permit: Thirteen (13) complete copies of the application, abutters list, plans and supporting documents.

For Variance: Eight (8) complete copies of the application, abutters list, plans and supporting documents.

Z.B.A Application, Abutters List and Additional Information are also available on-line at: WWW.STOW-MA.GOV

TOWN OF STOW ZONING BOARD OF APPEALS APPLICATION FOR:

- SPECIAL PERMIT
- DIMENSIONAL VARIANCE
- SIGN VARIANCE
- APPEAL of DECISION OF BUILDING INSPECTOR/ZONING ENFORCEMENT OFFICER/SIGN OFFICER

File one (1) copy of the Application (including plans and reports as required by the Rules and Regulations), folded to fit neatly within a legal sized file folder, to the Town Clerk.

Received and Filed with Town Clerk
Date _____
Stow Town Clerk _____

File nine (9) copies of the Application (including plans and reports as required by the Rules and Regulations), folded to fit neatly within a legal sized file folder, to the Zoning Board of Appeals along with an Application fee payable to "Town of Stow" in the amount required by the Rules and Regulations. Refer to the Rules and Regulations for details on the information required.

2.0 Project Narrative

Existing Conditions

The property is located at 89 Kingland Road which is shown on assessors Map U04, Parcel 62. The property is accessed by a gravel driveway and has frontage along the east side of Lake Boon. The parcel is approximately 10,411 SF in area and is located within the Residential Zoning District

The lot is non-conforming with respect to Lot area and Frontage. Additionally, the shape of the lot is narrow, which provides a very small building area. The existing dwelling does not meet the required rear yard & side yard zoning setback. As such, the lot is considered to be a Pre-Existing, Non-Conforming lot.

The existing dwelling is listed as a 2-bedroom dwelling based on the latest available assessors' records (See section 6 for property record cards). The dwelling has a total living area of 786 SF. Access to the dwelling is provided via a concrete stairway adjacent to a large concrete retaining wall.

Proposed Conditions

The applicant is proposing to remove the existing dwelling and construct a new two-bedroom dwelling with a paved driveway and new sewage disposal system. Additionally, the applicant is proposing to drill a new well to serve the proposed house. A site plan is attached showing the location of the proposed dwelling, septic system, & driveway.

The proposed house will be in an increase in the floor area as compared to the existing dwelling. As such, a Special Permit is required to extend the non-conformance of the property. The finished floor area of the proposed structure will be 2,060 SF. The house will also have an additional 720 SF of garage floor area.

Special Permit Criteria

Section 3.9.7.1 2. of the Zoning Bylaw states the following:

“the proposed alteration, extension or structural change itself does not conform to the requirements of the present Bylaw, and does intensify existing non-conformities or results in additional non-conformities, in which event a Petition for Special Permit must be made to the Board of Appeals, and the Board of Appeals must find that:

- a) there is no substantial increase in the nonconforming nature of said structure; and
- b) such reconstruction, alteration or extension will not be substantially more detrimental to the neighborhood than the existing nonconforming structure.

The following is a brief description of the proposed project with respect to each criteria listed above:

“...no substantial increase in the nonconforming nature of said structure”

The existing dwelling is approximately 8.1-feet from the southern property line. The proposed dwelling will not be located any closer than 8.1 from the side lot line. Additionally, the proposed house (elevated deck) is approximately 27.3-feet from the rear lot line. This is an improvement over existing conditions, as the existing structure is approximately 16.5-feet from the rear lot line. The proposed house will meet the front yard zoning setback.

The finished floor area of the proposed house will increase from 786 SF to 2,060 SF. Section 4.4 (Table of Dimensional Requirements) does not have a maximum floor area ratio listed for the site. As such, the increase in the floor area of the structure does not create a great non-conformity on the lot.

“...not be substantially more detrimental to the neighborhood”

The applicant is proposing to remove an existing two-bedroom dwelling and construct a new, two-bedroom dwelling which will fit into the architectural character of the neighborhood. The proposed use will be identical to the existing use and harmonious with the other uses in the neighborhood. The applicant has been working with an architect to ensure that the proposed dwelling is consistent with other properties on Lake Boon and in the Town of Stow.

Architectural renderings prepared by the Client's Architect are attached.

Variance Criteria

As set forth in Mass. General Laws Chapter 40A and Section 4.1 of the Town of Stow Zoning Board of Appeals Application Requirements, Procedural Rules, and Application Forms for Variance...”, the applicant must show that all of the following conditions are met:

- 1) That there are circumstances relating to the soil conditions, shape, or topography of such land or structures and especially affecting such land or structures, but not affecting generally the zoning district in which it is located.
- 2) That literal enforcement of the provisions of the ordinance or zoning bylaw would involve substantial hardship, financial or otherwise, to the petitioner or appellant.
- 3) That the desired relief may be granted without substantial detriment to the neighborhood.
- 4) That the desired relief may be granted without nullifying or substantially derogating from the intent and purpose of such ordinance or bylaw.

The proposed project satisfies each of these criteria as follows:

“...circumstances relating to the soil conditions, shape, or topography...”

The existing site is a small lot at 10,411 Square Feet. As such, the buildable area on the lot is extremely limited, with the width of the area between the zoning setbacks being less than 10-feet wide. Additionally, the topography of the lot is level adjacent to Kingland Road, but slopes steeply toward Lake Boon just prior to the existing house, where a large retaining wall and stone steps provide access to the dwelling and to the edge of the water. The proposed dwelling will require a new septic system and private well. The septic system is proposed adjacent to the proposed driveway adjacent to Kingland Road and the proposed well will be installed down gradient from the septic system between the proposed house and Lake Boon.

Given the shape and size of the existing lot, the buildable area on the property within the zoning setbacks is only 10-feet wide, with a total footprint of less than 1,000 square feet. As such, it is not feasible to construct a livable home that conforms entirely with the required zoning setbacks. The proposed house has been situated on the lot such that a large portion of the living area falls within the footprint of the existing house or within the allowable building footprint area on the lot.

“...substantial hardship...”

The existing dwelling on the lot is not currently suitable as a living space for the owner of the property. The proposed structure will meet the clients needs for a suitable living area and will be an improvement over the existing conditions of the site with respect to grading, layout, & access.

“...without substantial detriment to the neighborhood.”

The proposed house will not be located any closer to a side lot line than the existing house. The proposed structure will comply with the front yard zoning setback and will decrease the level of non-conformity with the rear yard zoning setback. The property is abutted by a parcel of vacant land to the north (owned by the town of stow).

“...without nullifying or substantially derogating from the intent and purpose of the bylaw...”

The variance will positively serve the intent and purpose of the bylaw by allowing the construction of a new residential dwelling and appropriate sewage disposal system and private well. The proposed dwelling will have safer access, fit in with the existing topography of the site, and will provide a level of landscaping on the site that does not exist there today.

Specifically, the variance would not derogate from the intent of the Bylaw or its purposes as stated in Section 1.2, as follows:

1. ***Protect the public health and safety and general welfare of present and future inhabitants,***

The existing house is currently accessed by a steep stone staircase with approximately 7 feet of elevation drop from the existing gravel parking area to the existing dwelling. The proposed dwelling will have a garage on the upper level of the property to provide ease of access to the dwelling. There will still be a staircase on the north side of the house to provide access to the lower level of the house and to Lake Boon. The grading of the proposed house is proposed to minimize the grading impacts to the existing topography of the site and will not have a substantial impact to the existing drainage patterns of the site.

2. ***Preserve environmental resources of the Town,***

The proposed project will include the installation of a new private well and sewage disposal system to service the new dwelling. The proposed house has been situated on the lot such that it provides a greater setback from the edge of Lake Boon than the existing dwelling. All portions of the proposed house, including the proposed deck, are located outside of the 35-foot "No-Touch" wetland buffer zone. The proposed use of the site will be exactly the same as the current residential use of the property. As such, no adverse impacts to the environmental resources of the Town are anticipated.

3. ***Maintain open spaces by recognizing the concern for irretrievable loss of farmland, wetlands or woodlands while respecting the rights of landowners,***

Tree removal for the proposed project has been minimized to the greatest extent practicable. The Applicant will be working with a Landscape Architect to produce a landscape & planting plan for the new dwelling. All disturbed areas that are not landscaped will be restored with a minimum 4" of loam and seed.

4. ***Encourage the most appropriate use of land through a proper balance of residential, commercial and industrial designations,***

The proposed property falls within the residential zoning district. The proposed use of the site will be exactly the same as the existing use, a two-bedroom, single-family dwelling.

5. ***Preserve the historical and cultural characteristics of the Town,***

The Applicant has been working with an architect to design a house that will fit with the architectural characteristics of the Town of Stow and that will be in consistent character with other residential dwellings on Lake Boon.

6. ***Achieve housing choices and a range of housing costs,***

The proposed dwelling will replace the existing residential dwelling. The proposed dwelling will be deed restricted to two-bedrooms and the proposed use of the dwelling is

exactly the same as the existing dwelling.

7. *To induce its citizens to remain in the community, thus providing a sense of history and continuity.*

The Applicant and owner of the property is proposing to construct the new dwelling to provide a house that is better suited to their needs with respect to living area, ease of access to the dwelling, and with an increased setback to the edge of Lake Boon.
