FINANCE COMMITTEE REPORT TO TOWN MEETING

Every Town in Massachusetts with a property valuation of over \$1 million is required by state law, MGL Ch. 19, Sect 16, to have a Finance Committee (Fincom) that shall “consider any or all municipal questions for the purpose of making reports or recommendations to the Town.” According to the Department of Local Services (DLS), the Finance Committee is “the official fiscal watchdog for a Town. Because it is difficult for all taxpayers to be completely informed about every aspect of a Town’s finances, Fincoms were established so a representative group of taxpayers could conduct a thorough review of municipal finance questions on behalf of all citizens.”

With this in mind, the Fincom’s primary responsibility is advisory, to examine the budget and all other warrant articles and make recommendations to the voters on each article. It also administers the Reserve Fund (\$80,000) to provide for urgent and unforeseen expenditures that might arise between Town meetings. Lastly, although it is not required in our Charter, the Finance Committee Annual Report provides the Voters with an overview of the Town’s financial condition.

In Stow, the Moderator appoints five voting members and up to five associate members to the Finance Committee. Any voter registered in Stow is eligible to join. As of the publication date, there are five voting members and zero associate members on the committee.

FY 2022 Review

Town Revenues

Town revenues totaling \$33,596,101 in FY22 is a 4.94% increase from FY21, with property taxes mainly funding the town’s operations at just over 89% of the total. This percentage decreased slightly from 90.35% in FY19.

Local receipts decreased by 1.62% for FY22, a decrease of \$26,609. It is worth noting that \$1,281,419 of Savings and Other Funds was used to balance the budget, an increase of 89.61% in use of those funds from FY21. Table 1 shows a comparison of revenue sources for FY21 and FY22.

Town Savings

Town savings (Free Cash plus the Stabilization Fund) are “rainy day” accounts that are built up during good times and drawn down in bad times. Free Cash comes from receiving more-than-budget revenue (taxes, state aid, budget money left over from the prior year) and/or spending less than our voted budget. It is annually certified each year by the Department of Revenue (DOR). Once certified, free cash is available for appropriation throughout the fiscal year, to be spent for any lawful purpose. Every dollar of free cash appropriated as revenue in the FY22 budget is a dollar that does not need to be raised and appropriated through taxation.

These savings are a necessity, not a luxury, and accumulate to build a targeted balance or used to fund the next year’s budget. In discussions with Standard and Poor’s leading up to our AAA rating approval, the Town was encouraged to attempt to maintain a stored asset balance of between 5% and 10% of the overall budget.

Property Tax Rate and Property Valuations

The information presented in Table 4 shows the trends in the tax rate, average single family home valuation and average single family tax bill. While Stow’s tax rate has continued to decrease, our average single family home valuation and tax bill continue to increase year-over-year. The town’s FY2023 tax rate was certified at 18.13 or a 7.89% decrease from FY22.

Fiscal Year 2024 Proposed Budget Analysis

Looking forward to the 2024 requested budget and comparing to the 2023 voter-approved budget, key highlights are as follows:

- Total revenue is estimated at \$38,303,571 including unused levy capacity. The primary contributor to the revenue estimates is property tax. Of the \$38M, \$31.7M is attributable to property tax, inclusive of the prop 2 ½ increase allowance. In addition, the Town Administrator is estimating the new growth revenue at \$250,000. This projected total FY24 levy limit revenue of \$32,036,496 represents a 3.31% increase over FY23.
- Based on the initial indications from the State regarding State Aide Revenue, we are only estimating a small increase of 2% (\$12k). While the State’s revenues continue to increase in record amounts, the contributions to cities and towns has remained low and with a minimal increase.
- The increase in local receipts (motor vehicle excise tax, permit fees, license fees, etc) is projected to be 4.5%.
- The Town Administrator is proposing to use \$1,103,298 of Free Cash in FY24, which will be applied to the following:
 - Transfer \$200k into the Stabilization Fund;
 - Transfer \$75k into the Capital Stabilization Fund;
 - Contribute \$235k to the OBEP Trust Fund;
 - Use \$10,000 toward the Opioids Epidemic; and
 - Use \$583,298 to fund the Capital Plan.
- FY2024 expenditures are dominated, as is typical, by the Nashoba school assessment at 52% of expenditures, followed by the municipal budget (31.38%), insurance and debt service (9.81%), and Minuteman assessment (7.04%). As with all three towns in the Nashoba regional district, Stow’s educational expenses are a substantial portion of the total expenditures in any given year and so careful consideration of academic spending can have a dramatic impact on the town budget.

- Total expenditures are expected to increase by 5.42%. While the Nashoba assessment remains the largest line item, from FY2023 to FY2024 the school assessments increased by a combined 4.61%. The budget requests include an 8.64% increase in the municipal budget, a 29.17% decrease in capital expenses, and a 41.69% increase in special article expenditures.
- The net increase for the FY24 budget is 5.01% over the FY23.

The increase in municipal budget is driven predominantly through wage expenses with relatively little increase in department expenses. Further, the increase in wage expense is driven by the addition of new or amended positions far more than actual wage increases.

- Addition of a full-time patrol officer. The Police Chief reallocated his budget and was able to absorb the cost of the new officer, as well as other contractual changes, to within a 5% overall increase for the police department.
- Addition of 2 full-time firefighters (15.6% of the municipal budget increase)
- Addition of the Procurement/Grants Administrator into the budget. This position was funded through ARPA funds for the first year. The addition of this position constitutes an 8.34% of the municipal budget increase.
- The Select Board renegotiated the Town Administrator's contract; as a result of the market rate for the TA position, an increase has been budgeted for. While this increase may appear large, the Finance Committee has ascertained that we have been underpaying the TA. This increase will bring her up to the median salary, however, she will still be far below the median for total compensation in the region. The Finance Committee supports this pay adjustment to bring the Town Administrator closer to the median market value for her position. This increase represents 3.29% of the municipal increase.

Fiscal Year 2023 Special Articles – Raise & Appropriate

Special articles have increased from \$474,100 to \$671,733, an increase 41.69%. Major contributors to the increase are:

- The Planning Board has made several requests that require new funding:
 - A request for \$100,000 to obtain a consultant to assist with the Master/Comprehensive Plan;
 - A request for \$35,000 to develop access to the Kane Lane property; and
 - An increase in their funding for engineering assistance.
- The Historical Commission is looking for \$10,000 to assist with getting the West School on the historical register.
- The amount for funding the Annual Financial Audit has increased by \$10,000.

In the past, the majority of the capital allocation year over year increase is driven by allocation of CPC funds. Omitting the CPC fund usage, significant contributors to the capital allocation is the town's need to replace aging vehicles and infrastructure. Stow tends to maintain vehicles for extended periods, with highway equipment having service lifetimes upwards of 30 years. Having deferred vehicle replacement, the town is now in a place where key pieces of highway equipment and a majority of other municipal vehicles (police cruiser, ambulance, municipal vehicles) are

becoming unsafe to operate and must be replaced. Additionally, vehicles are experiencing a 1-2 year backorder. In order to ensure we have vehicles in place, when those aging vehicles can no longer function, we need to order now and get in the replacement queue.

In 2021, the town was allocated \$2.1M in funds from the American Rescue Plan Act (ARPA) and a number of regular capital expenditures were funded through the ARPA funds, thereby removing the liability from the Stow taxpayer.

Therefore, for FY24, the non-CPC capital, non-ARPA requests total \$583,298, which will be paid for with certified Free Cash. These requests represent the largest to be paid for with cash:

- Replacement of the interior doors at Hale School (17% of the request)
- Replace the Cemetery Truck (16% of the request)
- Replacement of a police cruiser with an all-electric pick-up truck (15% of the request)

For FY24, due to the large number of projects submitted for Capital, the Town Administrator is proposing we procure several capital items through borrowing. With larger vehicles on backorder, this will allow us to sign a purchase order, but not hold up cash, while we wait one to two years for delivery. It will also allow us to repair aging infrastructure within the general fund budget, while budgeting for a principal and interest payment over a number of years and not all at once. The items being proposed as borrowings are:

- Replacement of a Large 6-Wheel Dump Truck in the Highway Department (\$265,000)
- Replacement of Ambulance Rescue 16 in the Fire Department (\$436,800)
- Repairs and upgrades to the Town Building Water System (\$750,000)

Conclusion

Coupled with the growth in housing prices, the Town-wide valuation has grown faster than our costs (i.e. budget expenditures growth), allowing the Town to fund approved projects and capital items for the last several years. Moreover, the Town enjoys more than enough stored assets, and could borrow at the lowest rates due to our AAA rating. Moreover, the Town Administrator is estimating a \$1.8M excess Tax Levy capacity. As previously mentioned, this allows the town to borrow money at a more favorable rate.

It is our opinion that this is a fair and accurate picture of the Town's financial state. Whether you are pleased or displeased, the Finance Committee reminds everyone that Town Meeting directly controls the rate of growth of Town expenses. We encourage your participation.

Respectfully submitted,

Erica Benedick (Chair), Chris Buck (Member), Kevin Gross (Member), Brian Patuto (Member), Evgenia Petrova (Member).

Re: FY24 Budget Recommendations

Date: April 3, 2024

The Fiscal Year 2024 (FY24) Operating Budget process provided an opportunity for management to, once again, undertake an honest assessment of town functions to determine what is working and what changes are necessary. Some of the recommended changes contained within this memorandum will have cost implications for the FY24 budget. Beginning in the FY23 budget, we started making some necessary staffing changes, which would bring the needed staffing levels up to par on an operational standpoint. This FY24 budget includes some new or modified staffing to take the next step towards our goal of providing the most resources to our residents, while maintaining a streamlined and efficient budget.

Like last year, we are still getting out from under the accumulation of years of conservative budgeting, which while assisting the town in limiting our expenditure outlay and increased our Unused Levy Capacity to \$2.4M, created other operational issues within the Town. We took major steps with the addition of an Assistant Town Administrator to function as the Human Resources Director, and were also able to add highway, library staff, as well as facilities and community services staff. This year we will focus on public safety.

At the 2021 Annual Town Meeting, I presented changes to the Wage & Classification Schedules after a consultant was brought in to review the salaries of non-union staff. With these new schedules in place, we had to determine how employees would advance through the steps. At the 2022 Annual Town Meeting, Article 56 was unanimously approved, which changed the bylaw to allocate a step increase for July 1, 2023, to those in Grades 1 – 5. Therefore, this year, in addition to the 3% Cost of Living Adjustment (COLA), all employees in Grades 1 – 5, who were in steps 1 thru 11 will be granted a step increase. Employees in Grades 6 to 8 will be given the 3% COLA, as their step increase is not until next year (FY25).

Additionally, the Police Officers and Firefighters union contracts will expire on June 30, 2023. As the writing of this letter, the negotiations for the Police Union are still ongoing, so we made some

assumptions for salary and budgetary purposes. The Dispatchers and Fire Unions have finalized their FY24 benefits.

We continue to look for ways to streamline processes and make things more efficient. At the end of FY23, Karen Kelleher, ZBA Administrative Assistant is retiring and instead of trying to replace her knowledge and expertise with someone new, we are rolling the ZBA duties into the Planning Department. This will allow all land-use items to be consolidated under one department.

I am also working on consolidating all facility expenses. In the past, some buildings had to budget for their own heating, electric, trash pickup, landscaping, while the Town Building and Pompo were consolidated under the facilities budget. This year, I am moving those expenses from the library, police, and highway into the facilities department.

In addition to these increases, there are a few new personnel related changes that I am recommending for FY24, which are articulated below.

In this budget, I am recommending the following staffing changes:

- Adding One (1) full-time patrol officer
- Adding Two (2) full-time firefighters
- Moving the Procurement/Grants Administrator into the General Fund Budget

Full – Time Patrol Officer – Given the changes with the State and the new POST (Peace Officer Standards & Training) Commission, it has been increasingly more difficult for smaller towns to continue using Reserve Police Officers, as they now require the same level of training as fully certified officers. As a result, the Chief requested adding a full-time officer to the roster. With the proposed new developments at Athens Lane, Stow Acres, and the addition to Elizabeth Brook (Plantation) Apartments, and the overtime shifts that have gone unfilled by current officers, it was determined to be a necessary addition. The cost associated with this change is estimated at \$74,792 or a .65% increase in the municipal budget.

Adding Two (2) full-time Firefighter/EMTs – With the increase in medical calls, there have been more and more calls for service at the same time as another call. Adding two more full-time members to the department will allow for more efficiency in response times. Additionally, this will allow us to have one full-time member on every shift in the fire department. Currently we are operating the overnights with per-diem employees plus call employees. Our current hybrid model of full-time and call firefighters is sustainable, provided we add the resources that are necessary to sustain services to the expanding population. These two positions will give us more accountability and stability throughout the department and shifts while supplementing the full-time staff with per diems and call members.

We have applied for a federal grant for these positions and should this budget pass, we will not fill those positions until we hear on the grant. Only in the event that the grant is not successful, will we utilize the budgeted funds. The cost associated with these two additional positions is: \$117,411.84 or a 1.02% increase in the municipal budget.

Moving the Procurement/Grants Administrator into the General Fund Budget – With the influx of monies from the Federal Government by way of the CARES Act and APRA Funds, we had an increase in purchases and projects. It became necessary to bring on board someone to focus on the

procurement laws (both federal and state) and track grants for us. In 2022, the Select Board authorized use of \$65,000 in ARPA funds to hire a Procurement/Grants Administrator. That position was filled in October 2022 and quickly became an integral part of the team. The addition of this position has allowed Department Heads to focus on running their department and not having to research and write bid specs or contracts. For Fiscal Year 2024, I am moving this position into the General Fund budget, at a cost of \$62,500 or .54% of the municipal budget. It is expected, however, that this position will generate savings on bidding and bring in grant revenue to offset the cost of the position.

Expenses

The only significant increase in the expense side of the municipal budget occurs in the Technology Budget. Since 2020, the Town has been able to utilize federal revenues (CARES Act, ARPA Funds) to cover some large technology upgrades. As the available funds in those accounts winds down, over the next few budget years we need to incorporate the cost of these services into the general fund budget. This year, I am including the cost of our phone system and the Office 365 licensing into the budget. The licenses and fees associated with these items is approximately \$50,000 or .44% of the municipal budget.

Municipal

For the proposed FY24 Budget, municipal salaries account for 54% of the municipal budget and 19% of the entire General Fund Budget. Municipal expenses makes up 14% of the municipal budget and only 5% of the overall General Fund Budget. Municipal Insurance and Debt Service represents 31% of the Municipal Budget and 11% of the overall General Fund Budget.

For every one dollar of taxes paid to the Town of Stow, twenty-five (\$.25) cents covers the entire Municipal Budget, including insurance and non-excluded debt.

Education

As is the case most years, we have received assessments from the two school districts (Nashoba Regional School and Minuteman Vocational) with increases totaling just under \$1M combined. This increase is an increase of more than 4.61% over the FY23 assessments and \$177,681 more than the increased tax revenue we project under Prop 2 ½.

The 20.02% assessment increase (or \$429,421) at Minuteman is mainly due to increased enrollment and less out-of-district students attending. Since the new school opened, Minuteman has seen an increase in applications, primarily from member towns. As a result of fewer out-of-district students attending, the member towns need to pay more to cover those costs. Additionally, over the last several years, Stow's enrollment at Minuteman has increased to 65 students up from just 19 students five years ago.

The Nashoba increase is not as cut and dry to articulate. They have established their budget with an overall increase of about 3.55% over FY23. There is not one driving factor that we can point to as the basis for the increase. As a result of their total budget increase, Stow's assessment has increased 2.82% (or \$523,540) over the FY23 assessment.

The total FY24 Budget recommendation is increased by 5.42% over FY23. The two schools represent a total of 65% of the entire General Fund Budget and have an FY24 increase of \$952K combined or by 3.03% and the municipal budgets have increased by 2.39%.

For every one dollar of taxes paid to the Town of Stow, sixty-one (\$.61) cents goes towards the Nashoba and Minuteman Education Budgets.

For every one dollar of taxes paid to the Town of Stow, fourteen (\$.14) cents is used to pay the debt exclusions voted on by the taxpayers at the ballot.

There were other small changes within the FY24 Budget Proposal, but all other budgetary impacts were minor, as there are no proposed new programs. During FY24, we will continue to look for ways to make doing business with the Town more efficient while also remaining cost effective.

This year, the General Fund article requests have increased by more than 40% over the FY23 requests. There are a number of new initiatives that are being undertaken by Departments, Boards and Committees that account for the almost \$200,000 in increased requests, bringing the total of articles seeking to raise and appropriate from taxes, to \$671,733.

The Capital Plan requests also increased this year. As a result, I am recommending a combination of using free cash and borrowing. The recommendation for funding with free cash is \$583,298, which is down from last year's recommendation of \$823,500. But I am recommending three items to be borrowed and paid for within the town's tax levy. The total of those items is \$1,451,800. With inventory delays of up to two years, this will allow us to sign a purchase order, but not hold up cash, while we wait one to two years for delivery. It will also allow us to repair aging infrastructure within the general fund budget, while budgeting for a principal and interest payment over a number of years and not all at once. This plan of sharing the expenditures between the town and the taxpayers is looked upon favorably by the rating agencies and is expected to have a positive impact on future borrowings.

As I indicated in my letter last year, the Town is still in the process of catching up from years of static staffing levels, even though the number of residents has continued to grow. We will evaluate staffing levels each year to ensure that the service level we provide to our residents continues to increase but in the most cost effective and efficient manner.

I believe this FY24 budget is necessary for effective Town operations and ask for your support. I welcome an opportunity to discuss the FY24 Budget and answer any questions anyone may have.

Thank you.

ARTICLE 61. Adoption of Specialized Energy Code

To see if the Town will vote to amend Article 16 of the Town of Stow General Bylaws for the purpose of regulating the design and construction of buildings for the effective use of energy and reduction of greenhouse gas emissions, pursuant to the entirety of 225 CMR 22 and 23 including Appendices RC and CC, including future editions, amendments or modifications thereto, with an effective date of January 1, 2024, a copy of which is on file with the Town Clerk and by striking out the title of Article 16 and inserting in place thereof the following title: “Specialized Energy Code”, or to take any other action relative thereto.

(Green Advisory Committee)

The Finance Committee recommends APPROVAL of this article. Passage of this article does NOT increase expenditures.

The Municipal Opt-in Specialized Stretch Energy Code (Specialized Code) was designed to help achieve MA GHG emission limits and building sector sub-limits set every five years from 2025 to 2050. As a result, all compliance pathways under the Specialized Code are designed to ensure new construction that is consistent with a net-zero Massachusetts economy in 2050, primarily through building envelope energy efficiency, that it turn enables reduced heating loads and efficient electrification. The largest greenhouse gas emissions impact for many buildings stems from the heating loads and choice of heating fuel for the building. Buildings reliant on combustion equipment have no clear path to zero emissions, while electrically heated buildings using heat pump technologies do due to the steady increase in renewable and clean energy sources on the ISO-NE electric grid, and opportunities for distributed solar and other on-site renewable energy generation. Accordingly, the Specialized Code requires all new buildings to be designed with electric service and wiring sufficient for future electrification of space and water heating as well as any combustion equipment appliance loads.

ARTICLE 62. Box Mill Road Bridge – MassDOT Project

To see if the Town will vote to: (a) authorize the Select Board to acquire, by purchase, gift and/or eminent domain, the fee to and/or permanent and/or temporary easements, for public way purposes, including, without limitation, for the construction, alteration, installation, maintenance, improvement, repair, replacement and/or relocation of rights of way, sidewalks, bridges, drainage, utilities, driveways, guardrails, slopes, grading, rounding, construction, landscaping, wetlands replication, and other appurtenances and/or facilities, to enable the Town to undertake the Box Mill Road Bridge Project and for any and all purposes incidental or related thereto, in, on and under certain parcels of land located on or near Box Mill Road and approximately shown on plans entitled “Massachusetts Department of Transportation Highway Division Plan and Profile of Box Mill Road Over Elizabeth Brook Bridge No. S-29-011 in the Town of Stow Middlesex County,” prepared by Green International Affiliates, Inc., on file with the Town Clerk, as said plans may be amended and/or incorporated into an easement plan, and land within 200 feet of said parcels; (b) raise and appropriate, transfer from available funds, and/or borrow a sum of money to fund the foregoing and any and all costs incidental or related thereto, including, without limitation, the cost of any land/easement acquisitions, appraisals, and surveys; and, further, (c) authorize the Select Board to enter into all agreements and take any and all actions as may be necessary or appropriate to effectuate the foregoing purposes; or take any other action relative thereto. **Requires 2/3’s affirmative vote**

(Planning Board)

The Finance Committee will make a recommendation on this article at Town Meeting. The Select Board recommends APPROVAL of this article. The Planning Board recommends APPROVAL of this article. Passage of this article does NOT increase expenditures.

This proposed creation of the Lower Village Business District is intended to revitalize Stow’s primary business area to become a walkable, vibrant village center. The Bylaw directs the long-term development of Lower Village and provides greater control to Stow residents and the Planning Board to influence the look and feel of Lower Village.

The Planning Board has reviewed how zoning impacts various struggles Lower Village faces, including a high vacancy rate, an uninspired mix of businesses, auto-dominated streetscapes, and a lack of a sense of place, meaning that it does not reflect the community in which it is located. With added flexibility for property owners to redevelop and a focus on design and aesthetics, the proposed bylaw allows the district to shift over time from its current state to that of a traditional village center. Village center design is exemplified by walkability, a strong mix of businesses, inclusion of housing opportunities, accessibility by multiple modes of transport, and a distinct sense of place.

The Planning Board has worked over the last decade to study the business conditions and market of Lower Village, assess residents’ architectural and design preferences, and to solidify a vision of Lower Village. The Lower Village Revitalization Committee synthesized years of public engagement and research into their final report, which includes the following vision statement: “Lower Village will be an attractive gateway to Stow, developed in the tradition of a New England village, where residents and visitors can safely and conveniently live, work, shop, dine and recreate. As the primary gateway into town, Lower Village will project the history and character of Stow through the architectural compatibility of its buildings and streetscape, providing residents and visitors with a defined sense of place. Lower Village will be a place to meet and connect, with civic spaces for gathering, and wayfinding to attractions, including farms, orchards, conservation areas and the Assabet River Rail Trail. Businesses will thrive in Stow’s revitalized hub, attracting people of all ages to services, shopping, and entertainment opportunities accessible by all modes of transportation.” The proposed bylaw changes have been developed in recent years with assistance from consultants to ensure that the Town’s vision of Lower Village is achieved.

See Appendix C for the proposed Lower Village Business District Map.

3.3.5.5 **Design Standards for the Lower Village Business District**

The following Design Standards shall be used as a tool to help guide development and redevelopment, assuring that advancing the vision for the LVBD is an integral part of the permitting process. The Design Standards are a set of principles that offer a positive direction for BUILDING and site level design meant to incentivize creative development outcomes that support the evolution of Lower Village into a socially and economically vibrant District.

Architectural and site design shall conform to the intent and principles described in the design standards of Sections 3.3.5.6 – 3.3.5.13. Sufficient justification and/or rationale shall be provided in the Application for any derogations from design standard intent and/or principles described herein.

3.3.5.6 **Architectural Design Standards**

Residents of the Town of Stow have shown a strong preference for BUILDINGS that include New England vernacular architectural traditions. Despite this preference, BUILDINGS in the LVBD are not required to appear historic, but rather respectful of historic traditions, while remaining functional and authentic. Architects are encouraged to look to the historic structures of Lower Village and Stow’s surrounding neighborhoods for inspiration.

All BUILDINGS and BUILDING additions shall be designed by an architect registered and/or licensed to do business in Massachusetts, unless otherwise waived by the Planning Board.

3.3.5.7 **Architectural Design of BUILDINGS**

- a. *Pedestrian Scaled Architecture* - The guiding principle of BUILDING design is that they shall be designed to the pedestrian scale. Pedestrian scale refers to the ability to design and shape BUILDINGS, OPEN SPACE, and streetscapes scaled to the pedestrian. Pedestrian scale design may be represented in the following manner:
 - i. Each individual architectural element of a BUILDING should be proportionate in relation to the overall BUILDING design;
 - ii. The scale of the entire façade should relate to and be respectful of the pedestrian-scaled streetscape.
 - iii. Floor to floor heights should be governed by exterior proportions rather than building systems, and not be elongated or exaggerated to cover up functional elements.
 - iv. Uniformity in height shall generally be avoided. See façade design standards.
- b. *Architectural Style* - While no specific architectural style shall be required, proposed BUILDINGS and STRUCTURES shall strongly consider New England architectural traditions. BUILDINGS shall be pedestrian scaled and designed to create a positive contribution to the STREET or INTERNAL ACCESS DRIVE upon which they are oriented.
- c. *Corporate Images* - Individual corporate image, trademark, or marketing architectural design elements and colors shall be incorporated only as secondary design elements of the BUILDING or SIGN and not as the dominant design element. These architectural design elements shall not define the character or style of the BUILDING or development.
- d. *Design Consistency* - A BUILDING’s architectural style shall be generally consistent throughout, however details from different eras may be mixed on a single building, as exemplified in the below image.

Example of incorporating façade and architectural design standards.

3.3.5.8 Façade Design

Single and multi-story BUILDING facades shall be designed to promote visual interest and street level activity where applicable. Similar to the overall design of BUILDINGS, the scale of the entire façade should relate to the pedestrian-scaled streetscape. Single story BUILDINGS shall include peaked roofs or raised parapets.

- a. *Architectural Details* - All sides of a building should contain architectural elements that define the overall architectural approach. Details such as texture, pattern, color, and building form used on the front façade should be incorporated on all facades as practicable.
- b. *Entrance Design* - Primary entrances to BUILDINGS shall be emphasized through detailing, massing, changes in materials, or other architectural methods to create entrances that are physically and visually accessible, welcoming and inviting, including but not limited to recessed entry ways, corner entries and other techniques.
- c. *Decorative Elements* - Decorative design elements shall be consistent with the architectural character of the BUILDING and scaled appropriately. Design elements shall add depth and visual interest to BUILDING facades, and could include the mixing materials and colors, decorative trim and molding, cornice details, stepped facades, and/or columns.
- d. *Massing and Articulation* - Façade articulations should be used to reduce the apparent length, monotony and mass of larger buildings, creating the illusion of several smaller buildings with common walls and a consistent rhythm of facades. All buildings shall have sufficient relief which interrupts the horizontal and vertical plane of each wall. Where appropriate, a repeating pattern of articulation may be used to provide continuity and balance.

Example of building footprint massing and articulation that provides opportunities for functional open space and breaks in the visual scale of the building.

- e. *Materials* - Materials such as brick, wood, stone, iron, and glass provide a sense of permanence to BUILDINGs, and should be used where appropriate to provide texture and visual interest to the streetscape and/or support transitions to FUNCTIONAL OPEN SPACES. Products that reasonably imitate the above materials may also be considered.
- f. *Awnings* – Awnings are permitted on BUILDINGs at a first floor entrance facing a public STREET or an INTERNAL ACCESS DRIVE. They may project over a public ROW provided that proof of insurance is provided. A minimum clearance of ten feet shall be maintained between the ground surface and the lowest element of the marquee or awning.
- g. *Functional Elements* – All vents, down spouts, flashing, electrical conduits, meters, service connections and other functional elements shall be treated as integral parts of the design to the extent practicable. Where appropriate, these elements shall be painted to match the color of the adjacent surface, unless used expressly as an accent.

3.3.5.9 Multi-Story BUILDING Design

To promote street level activity, multistory BUILDINGs shall be designed to provide a sense of “base,” “middle” (where applicable), and “top.”

- a. Ground-level facades along public STREETs or INTERNAL ACCESS DRIVEs shall be given a “stronger” appearance than upper floors. Such a distinction between ground-level facades and upper floors may occur by incorporating two of the following features: color change, texture change and material change;
- b. Ground floor ceiling height shall be taller than upper stories to emphasize the ground floor as the “base” of the buildings. Ground floor ceiling heights should be a minimum of 10 feet;
- c. Middle floors of BUILDINGs shall be made distinct from the ground floor by a change in material or color, window treatment, incorporation of balconies, setbacks, signage bands, and other elements as appropriate. Horizontal moldings, belt courses, or other features should be utilized to create visual separation between each story of the building.
- d. The top of the building shall emphasize a prominent edge when viewed against the sky, utilizing elements such as projecting parapets, cornices, upper level setbacks, pitched rooflines or other design elements as applicable.

3.3.5.10 Sign Design Standards

Business signage in the LVBD should reflect the vitality of the District and add value and a sense of continuity to the surrounding area. Signage shall be reviewed as part of Site Plan Approval and shall be provided in accordance with this Section 3.3.5.10 and Section 6.3 of the Zoning Bylaw.

- a. Signs along a pedestrian oriented streetscape should be scaled to the pedestrian, potentially in the form of a hanging sign above the business establishment or other options that include texture or architectural components that can encourage pedestrian traffic;
- b. All signs should reflect or otherwise complement the design, architectural style and materials of the BUILDING, landscape design style, site or District as applicable. For instance, sign borders may be trimmed with corresponding elements, such as moldings that reflect the architecture of the BUILDING. Top caps or other embellishments could be added to sign posts;
- c. New construction should anticipate signage, and provide logical sign areas allowing for flexibility for new users as the building is reused over time;
- d. Signs on a BUILDING should enhance or fit within a BUILDINGs architecture, rather than obscure architectural elements. This can be achieved by locating signs within specific architectural sign bands whether on the subject BUILDING or creating continuity with sign bands on adjacent BUILDINGs;
- e. Sites with multiple signs should seek to coordinate the materials, letters and styles to the extent practicable for the purpose of providing a shared identity to the site and overall District;
- f. Corporate logos and graphics should be incorporated into the sign design, rather than become the sign itself.

3.3.5.11 Exterior Lighting Standards

Exterior Lighting in the LVBD should provide for the safety of all users while signaling entry into the District by unifying design elements and providing a welcoming village business area. Lighting shall enhance, or not negatively impact, community ambiance and character of the District. Beyond the provisions in this Section 3.3.5.11, all exterior lighting must comply with the provisions of Section 3.8.1.5 of the Zoning Bylaw.

- a. All BUILDING lighting is to be dark sky compliant and shall use warmer color lighting where possible. Lighting shall be low level and no brighter than necessary.
- b. Lighting should reflect or otherwise complement the design, architectural style, and materials of the BUILDING,
- c. Lighting shall be designed and maintained so as to protect adjacent properties, motorists, and the night sky from intrusive lighting.
- d. Temporary lighting for events sponsored by the Town or for which an Event Special Permit has been issued is allowed, such as lighting for pop-up markets, theatrical or video production.
- e. Holiday, string, festoon, and similar decorative lighting shall be allowed.
- f. All non-conforming lighting shall be brought into compliance when replacement with new lighting equipment is proposed, except a replacement of only lamps or bulbs.

3.3.5.12 BUILDING Siting and Orientation

The siting and orientation of BUILDINGs in the LVBD shall adhere to the principles of vibrant, pedestrian-oriented streetscapes. The Planning Board encourages site plans where buildings are oriented towards and help to shape the public space along streets, parks and public gathering spaces, with parking lots hidden behind buildings.

- a. *INTERNAL ACCESS DRIVES* – Applicants are encouraged to design INTERNAL ACCESS DRIVES as a tool for:
 - i. Creating internal streetscape environments either perpendicular or parallel to Great Road/Route 117, or within the site;

- ii. Siting the primary orientation of BUILDINGs to create visual interest and allow multiple BUILDINGs within a development to relate to each other in a manner that enhances pedestrian access;
- iii. Activating the primary entrances of BUILDINGs and NEIGHBORHOOD and SPECIALTY RETAIL CENTERS that are oriented toward Great Road/Route 117;
- iv. Positioning access points for potential future inter-lot connections where current connections are not physically possible, or where agreement between landowners has not been reached.

Example of Internal Access Drive positioned for streetscape parking off Route 117.
Source: Stow Planning Department

- b. *Inter-Lot Connections* – Connections between sites should be prioritized to reduce the number of vehicles utilizing entrances onto Great Road. In areas where an inter-lot connection may be preferred in the future, the location may be striped for parking in the interim period to ensure the connection point is maintained.
- c. *Streetscape Orientation* - The primary facades and main pedestrian entrances of BUILDINGs shall be situated on a STREET or INTERNAL ACCESS DRIVE with the emphasis on orientation toward streetscape environments.

Example of neighborhood retail center that is oriented toward an internal access drive.
Source: *Contextual Design on Cape Cod | Design Guidelines for Large Scale Development*

- d. *BUILDING Entrances* - At least one customer entrance shall be provided along a building face that fronts a STREET or INTERNAL ACCESS DRIVE. Where frontages are on both a public STREET and an INTERNAL ACCESS DRIVE, one entrance shall be located on the public STREET.
- e. *Site Cohesion* - Multiple buildings on the same site should be designed to create a cohesive visual relationship, as well as efficient circulation and access for pedestrians and vehicles. Accessory BUILDINGs should be designed to complement the primary BUILDING and/or USE on the site in design and material expression.
- f. *Location on Site* - BUILDING placement should take best advantage of solar orientation, climatic and other environmental conditions, should encourage safety and use of adjacent FUNCTIONAL OPEN SPACES.

- g. *Orientation to Open Space* - BUILDINGS adjacent to public open space and/or FUNCTIONAL OPEN SPACE should generally be oriented to that space as practicable.
- h. *Incorporation of FUNCTIONAL OPEN SPACE* - Land within the allowable setback should include FUNCTIONAL OPEN SPACES that accentuate and enliven the streetscape, including but not limited to shade trees and landscaping, pedestrian plazas, pedestrian-only streets, greenways, outdoor dining spaces, benches and bike amenities. Areas of lawn, without trees or landscaping shall be discouraged in the setback area. The design of proposed FUNCTIONAL OPEN SPACE shall anticipate future connections of FUNCTIONAL OPEN SPACE on abutting properties and provide design opportunities for such connections where applicable;

- i. *Low Impact Development* - Implementation of Low Impact Development techniques is strongly encouraged, including, but not limited to, storm water management practices, alternative surfacing materials, building and site design elements, and landscaping features.
- j. *Sustainability* - The practice of creating structures and using processes that are environmentally responsible and resource-efficient throughout a building's life-cycle from siting to design, construction, operation, maintenance, renovation, and deconstruction are strongly encouraged. Development of buildings with net zero emissions is strongly encouraged.
- k. *Utilities* – All on-site utilities shall be located underground.

3.3.5.13 **Parking**

The intent of parking in the LVBD is to incentivize decentralized parking areas that maintain a pedestrian streetscape environment, are oriented to incentivize shared arrangements and use with abutting LOTs, and landscaped to soften their visual impact. The following standards shall apply:

- a. Parking shall be located, to the maximum extent practicable, toward the side and rear of BUILDINGS and along property lines where joint-use or combined parking areas with abutting properties are proposed, exist or are anticipated;
- b. On-street parking on INTERNAL ACCESS DRIVES should be utilized to the extent practicable to promote active pedestrian streetscapes, provide for efficiency of circulation, and create opportunities to enliven the district;
- c. Parking shall be visually broken up to create a series of smaller groupings;
- d. Parking lots shall be designed to accommodate snow storage on site or a plan for off-site storage shall be approved;
- e. Landscaping within parking lots shall be designed to create spaces, define edges, provide shading, add seasonal interest and provide water quality treatment for runoff.

- f. Shade trees shall be evenly distributed within parking areas, and shall be placed to maximize shading affect;
- g. Where parking is located adjacent to a public STREET or INTERNAL ACCESS DRIVE, it shall be screened with a year-round screen between the parking and the sidewalk. The screen shall have a height between 36” and 42” and consist of a combination of landscaping and/or fencing. Screening areas shall be between 4 and 7 feet in depth;
- h. Pedestrian access to the parking lot shall be provided from the sidewalk as well as from any INTERNAL ACCESS DRIVE or business driveway as applicable;
- i. Solar or green roof parking canopies may be located within parking areas;
- j. Parking areas may include sheltered bicycle storage;
- k. Shared parking is strongly encouraged to reduce vehicular traffic, minimize impervious surface and encourage pedestrian movements between buildings;
- l. Accommodations for electric vehicle charging stations shall be provided to the extent practicable.

3.3.5.14 Dimensional Requirements

Development in the LVBD shall consist of work on a single PARCEL, or on multiple PARCELS under single ownership, with definite boundaries ascertainable from a deed or recorded plan. There shall be no minimum width, frontage, or lot area in the LVBD and no maximum floor area ratio. Any PARCEL or LOT created in the LVBD, inclusive of any proposed USE, BUILDING or STRUCTURE, shall have adequate access for accessing the use intended, shall provide evidence of deeded, legally enforceable access rights through a private driveway or access road.

- a. Access to Lower Village Business District zoned land- Access over Residential or Recreation-Conservation zoned land is prohibited.

3.3.5.15 Front YARD Setbacks

Setback requirements in the LVBD are intended to create active streetscapes with a diversity of landscaped areas, pedestrian amenities, and FUNCTIONAL OPEN SPACES in accordance with the Streetscape Orientation design criteria of 3.3.5.12. Front YARDS shall be the distance measured in a straight line between the LOT frontage and the nearest point of any BUILDING or STRUCTURE. The standards of Bylaw Section 4.3.2.6(1-4) shall not apply to PARCELS in the LVBD.

- a. Setbacks from Great Road – Front YARD setbacks shall be a maximum of thirty (30’) feet along Great Road.

Front yard setback requirements may be amended by the Planning Board for the following purposes provided the Design Standards of 3.3.5.6 – 3.3.5.13 are met:

- i. To allow additional BUILDINGS toward the rear of a LOT, such as in courtyard configurations, provided that the forwardmost BUILDING(s) on the lot comply with the front setbacks listed in this Section.
- ii. To allow for a BUILDING that includes multiple façade setbacks due to bump-outs, recesses, or other architectural features;
- iii. To allow for a BUILDING that includes an angled orientation to the STREET;
- iv. To allow for improved location and usage of pedestrian plazas, courtyards, terraces, outdoor dining spaces or other FUNCTIONAL OPEN SPACE.
- b. Parking for vehicles shall not be allowed within the required BUILDING setback, unless provided for the purpose of creating a streetscape environment on an INTERNAL ACCESS DRIVE in accordance with Section 3.3.5.12(a) of this Bylaw.
- c. The requirements of Section 4.3.1.2 regarding corner setbacks shall not apply to the LVBD, provided that the Applicant can demonstrate, through plans stamped by a registered engineer, that adequate sight lines exist for vehicles travelling in all directions.

3.3.5.16 Side and Rear Yard Setbacks

The minimum side and rear yard setback shall be zero (0) feet except where the side and/or rear yard of a PARCEL shares a LOT line with the Residential or Recreation Conservation District or residential uses within the LVBD, in which case the requirements of Section 3.3.5.17 shall apply.

3.3.5.17 Buffer to Abutting Districts and Residential USEs within the Lower Village Business District

The purpose of this Section is to mitigate the impacts of increased headlight glare, noise, waste management and other impacts associated with increased business and economic activity in the LVBD from abutting residential zoned properties, DWELLING UNITS and Districts. Landscaped buffers shall be improved with grass, trees, shrubs, flowers, or other materials to an adequate height and density to visually obscure parked vehicles from view. The mix of deciduous and evergreen vegetation varieties shall be tolerant to the climatic conditions of Stow.

- a. For LVBD PARCELS which abut the Residential District or Recreation Conservation District, the Planning Board shall require a fifty (50) foot landscaped buffer and/or fence, which is designed to minimize impacts in accordance with Section 3.3.5.18. For the purpose of this Section, the Lower Common, shown on Assessors Map R-30, Parcel 1, shall not be subject to buffer requirements. The Planning Board may reduce the buffer to no fewer than thirty (30) feet if sufficient protections and/or benefits are provided and where strict conformance would derogate from the intent of the design standards.
- b. Where a STRUCTURE, BUILDING, parking lot, or loading area is proposed on property abutting a residential use in existence prior to May 13, 2023, the Planning Board shall require a landscaped buffer of up to fifty (50) feet, though the Planning Board may reduce the buffer to no fewer than thirty (30) feet if sufficient protections and/or benefits are provided and where strict conformance would derogate from the intent of the design standards. Fencing may be used within the buffer to provide further visual reduction.
- c. Exposed storage areas, machinery, garbage "dumpsters," service areas, truck loading areas, utility buildings and structures shall be screened from the view of abutting properties and STREETS.

3.3.5.18 Landscaping Plan

Applications in the LVBD shall include a landscape plan designed by a professional landscape architect registered to do business in the state of Massachusetts. The Planning Board may accept a plan prepared by one other than a landscape architect if it believes the plan meets the design requirements below.

- a. Buffer areas shall be designed to form an opaque screen as plantings mature, for the purpose of mitigating the impact of abutting business USEs. Visual screening is required to a height of at least six (6) feet with intermittent visual obstruction to a height of at least twenty (20) feet.
- b. The opaque screen may be composed of walls, FENCES, landscaped berms or densely planted vegetation in a mix of deciduous and evergreen varieties, tolerant to the climatic conditions of Stow. At maturity, the portion of intermittent visual obstructions should not contain any completely unobstructed openings more than ten (10) feet wide.

3.3.5.19 Maximum Height of Structures

The intent of height limitations is to allow three occupied floors, with the uppermost occupied floor to be within a sloped roof to lessen the visual mass. No BUILDING shall have more than three (3) stories. The maximum height of BUILDINGS, including MIXED USE BUILDINGS and STRUCTURES shall be 35 feet. If utilizing a parapet fronted BUILDING, height shall be limited to 24 feet to accommodate two (2) stories, with an allowance for a third story with a step back from the front façade.

Rooftop gardens, patios, or other non-enclosed features designed for leisure shall not constitute a separate floor for the purpose of this bylaw.

The Planning Board may permit BUILDINGS of heights greater than 35 (thirty-five) feet in accordance with Section 4.2.1 of the Zoning Bylaw.

3.3.5.20 Maximum Business Tenant Unit Size

The purpose of this section is to minimize the potential for large, single use BUILDINGS to detract from the vibrancy, interest and pedestrian orientation of the LVBD. The maximum business tenant unit size within a BUILDING shall be limited to 20,000 square feet of GROSS FLOOR AREA.

The Planning Board may increase the allowable business tenant unit size where the Applicant can demonstrate that the BUILDING and/or site plan aligns with the Design Standards for the LVBD, and specifically includes design elements that support an active pedestrian environment.

3.3.5.21 Performance Standards

The following Performance Standards are meant to incentivize site planning that meets the intent of the Design Standards in Sections 3.3.5.6 – 3.3.5.13, while ensuring the Planning Board has an opportunity to mitigate development impacts depending on individual site characteristics. The Planning Board shall require compliance with the following standards on all LOTs in the LVBD.

3.3.5.22 MIXED USE BUILDING Standards

The purpose of allowing MIXED USE BUILDINGS in the LVBD is to provide for increased viability of the District’s business USEs and to diversify small-scale housing opportunities in Stow.

Development Standards for MIXED USE BUILDINGS

Location within BUILDING	DWELLING UNITS shall be prohibited on the ground floor of any BUILDING in the LVBD except as may be allowed in accordance with Section 3.3.5.23(d) of this Bylaw.
Maximum Number of Bedrooms	Two (2)
Maximum Dwelling Units Per Acre	Six (6)

- a. Housing units created as part of a MIXED USE BUILDING in the LVBD shall comply with the provisions of Section 8.9, Inclusion of Affordable Housing, which govern the inclusion of housing eligible on the Department of Housing and Community Development’s Subsidized Housing Inventory in the LVBD.

3.3.5.23 Ground Floor USEs

The ground floor of BUILDINGS shall be primarily occupied by USEs that promote an active streetscape and are designed in accordance with the Design Standards established in Sections 3.3.5.6 – 3.3.5.13. The following performance standards shall also apply to ground floor USEs:

- a. Ground floor BUILDING facades that contain entrances to ground floor USEs, shall have a defined arrangement and/or pattern of windows and doors. The Planning Board may require up to 50% of the ground floor wall area include transparent windows where the BUILDING is anticipated to include retail or RETAIL SERVICE ESTABLISHMENTS;
- b. Garage doors, including loading bays and docks are prohibited from the primary façade of BUILDINGS;
- c. Garage doors serving DWELLING UNITS shall not be located along the primary façade of BUILDINGS, or along the facade facing directly upon a public way;

- d. The Planning Board may permit ground floor DWELLING UNITS or associated storage spaces and/or stairway access within a multi-story MIXED USE BUILDING, provided the following:
 - i. The inclusion of such USEs conforms to the Design Standards established in Sections 3.3.5.6 – 3.3.5.13;
 - ii. DWELLING UNIT design and placement adds definition to adjacent business establishments and between USEs through architectural detailing, landscaping and other site design methods;
 - iii. No more than 50% of the total allowed number of DWELLING UNITS on the site are located on the ground floor.
- e. The Planning Board may permit ground floor DWELLING UNITS within a single-story BUILDING provided that DWELLING UNITS occupy no more than 50% of the GROSS FLOOR AREA.

3.3.5.24 **Incorporation of FUNCTIONAL OPEN SPACE**

The incorporation of FUNCTIONAL OPEN SPACES on LVBD sites is meant to create space for civic interaction, provide opportunities for future outdoor events and displays and to generally encourage activity that contributes to the vibrancy of the District. All developments requiring a Special Permit and/or Site Plan Approval shall include at a minimum, five percent (5%) of the LOT area as FUNCTIONAL OPEN SPACE. Amenities that qualify as FUNCTIONAL OPEN SPACE may be contiguous or spread among various locations on the site.

Examples of features that do not qualify as FUNCTIONAL OPEN SPACE include, but are not limited to, perimeter planting strips as detailed in Section 3.3.5.29, buffers from adjacent parcels and uses as described in Section 3.3.5.17, or small turf grass planted areas within parking lots that do not serve bioretention purposes.

In approving the Site Plan, the Planning Board will look for demonstration that the following opportunities have been considered:

- a. Proposed developments shall connect to abutting FUNCTIONAL OPEN SPACE areas where applicable to create a contiguous streetscape environment and improve village amenities;
- b. Portions of the FUNCTIONAL OPEN SPACE may be designed to function as low impact development and/or green infrastructure stormwater management areas, including but not limited to rain gardens, xeriscape landscapes, swales and other techniques. Such infrastructure may be incorporated into the FUNCTIONAL OPEN SPACE where such management techniques improve the aesthetics and/or functionality of the space.
- c. The Planning Board may require benches, sitting walls, waiting areas, bicycle racks, stroller bays, sheltered spaces near building entrances or other amenities that encourage interaction and activity.

3.3.5.25 **INTERNAL ACCESS DRIVES**

INTERNAL ACCESS DRIVES shall be designed in accordance with the Design Standards of Section 3.3.5.12(a). The following performance standards shall also apply to the design of INTERNAL ACCESS DRIVES:

- a. INTERNAL ACCESS DRIVES intersecting with Route 117/Great Road shall be positioned to align with existing intersections to the extent practicable;
- b. Parking spaces designed in a manner similar to traditional parallel or angled on-street parking is encouraged where practicable. Parking spaces shall be designed in accordance with Section 7.5 of the Zoning Bylaw.
- c. Turning radii and travel lane widths shall be designed to accommodate SU-30 emergency apparatus;

- d. INTERNAL ACCESS DRIVES shall be designed with measures to provide maximum safety and mobility for pedestrians, cyclists and motorists where practicable. Measures may include but not be limited to:
 - i. Bulb-outs / Curb extensions;
 - ii. Center island medians;
 - iii. Landscape treatments;
 - iv. Pedestrian refuge islands;
 - v. Raised crosswalks, speed humps and tables;
 - vi. Rectangular rapid flashing beacons; and
 - vii. Other measures as applicable.
- e. One (1) street tree shall be required for every thirty (30) feet of INTERNAL ACCESS DRIVE length, either provided at intervals or clustered to improve overall site aesthetics. The Planning Board may allow for a reduction in the number of required street trees where parking area shade trees are provided in close proximity, in accordance with Section 3.3.5.29 of this Bylaw.
- f. Curbing and structured drainage facilities shall be provided pursuant to the Stow Zoning Bylaw, Stow Subdivision Rules and Regulations, and all state and federal regulations.
- g. Other than secondary access for emergency use, no driveway for a non-residential principal USE shall cross land in a residential zoning district in which the principal use is not allowed.
- h. Sidewalks which meet the Massachusetts Architectural Access Board design standards shall be installed along both sides of INTERNAL ACCESS DRIVES. The Planning Board may waive the requirement for sidewalks along INTERNAL ACCESS DRIVE where the following design criteria are met:
 - i. There are portions of the INTERNAL ACCESS DRIVE which are primarily used for vehicle circulation and pedestrian circulation is otherwise adequately provided on the site pursuant to the Design Standards;
 - ii. Sidewalks and walkways that provide alternative pedestrian access are present adjacent to or within the parking area;
 - iii. The INTERNAL ACCESS DRIVE either currently does not or is unlikely to be used to provide pedestrian connection to an existing or proposed BUILDING or pedestrian destination.

3.3.5.26 Sidewalk Standards

Sidewalks are intended to connect all areas of a site that pedestrians may utilize. The standards are meant to ensure active BUILDING frontage, with ample space for outdoor displays, dining and wheelchair accessibility.

- a. In addition to the sidewalk requirements along INTERNAL ACCESS DRIVES, sidewalks and/or walkways are required to connect pedestrian destinations, including but not limited to:
 - i. Connecting the entrances between multiple BUILDINGS on site;
 - ii. Connecting to and from existing sidewalks along Great Road or INTERNAL ACCESS DRIVES;
 - iii. Connecting to adjacent FUNCTIONAL OPEN SPACE or public features, such as parks and playgrounds, courtyards, etc.
- b. Unless otherwise stated in this Section, all sidewalks and walkways shall meet the minimum requirements of the Massachusetts Architectural Access Board (MAAB);
- c. The Planning Board may allow sidewalks to be located wholly or partially within the street right of way, where such location will enhance the existing streetscape and where all necessary easements for continued pedestrian use are provided;

3.3.5.27 Pedestrian Access to BUILDINGS

Sidewalks and walkways shall service the primary entrances and/or facades of all BUILDINGS on a site in accordance with the Design Standards of Sections 3.3.5.6 – 3.3.5.13.

- a. Sidewalks and/or walkways along a BUILDING façade shall be at least ten (10) feet wide. The Planning Board may alter this requirement where the addition of landscaping or FUNCTIONAL OPEN SPACE offers improved streetscape design;
 - i. Sidewalks servicing the primary entrances of BUILDINGS shall be separated, as practicable, from the STREET or INTERNAL ACCESS DRIVE with a landscaped buffer to protect pedestrians from parking and create an inviting streetscape. The landscaped planting zone between the sidewalk and STREET, parking area or INTERNAL ACCESS DRIVE, shall extend at least 50% of the façade length. The desired landscaping separating the sidewalk from the street shall be restricted to ‘soft’ plantings such as trees and shrubs in a bed of mulch, grass, or groundcover.
 - ii. Landscaped buffers shall consist of shade trees placed at intervals as described in Section 3.3.5.24(e) along with other landscaping, and street design elements such as benches, shrubs, or grass. Landscaping shall be organized in clusters of plantings where applicable rather than in a rigid line along the front of the lot. Landscaped buffers that include street design elements may not be counted toward the 5% minimum FUNCTIONAL OPEN SPACE.
- b. To the extent practicable, sidewalks shall have a degree of shelter achieved through the combined use of building fronts, trees, low hedges, arcades, trellised walks, or other means to delineate the pedestrian space;
- c. Outdoor restaurant and café seating, merchandise displays, planters, trash receptacles and sandwich board signs placed on the sidewalk shall leave a pathway along the sidewalk of at least four (4’) feet that is free of obstruction.

3.3.5.28 Parking Requirements

The purpose of this Section is to incentivize decentralized parking areas that provide a diversity of walkable, pedestrian streetscape environments that are oriented to encourage shared arrangements with abutting lots and landscaped to soften their visual impact.

- a. *Conformance to Design Standards* – Any parking area serving a USE or USEs allowed in the LVBD shall be designed in compliance with the standards and design guidelines in Section 3.3.5.13.
- b. *Parking Lot Construction* - Required parking spaces, loading areas and INTERNAL ACCESS DRIVES shall be provided and maintained with suitable grading, paved surfaces and adequate drainage which is suitable in accordance with good engineering practices.
- c. *Minimum Parking Accommodations* The base parking schedule for the Lower Village Business District shall be approved in accordance with Section 7.3.3.5 of the Zoning Bylaw and shall apply to individual uses in the Lower Village Business District. As part of the LVBD Special Permit process, the Planning Board may permit reductions or increases to the requirements of the Schedule of Parking. The Planning Board shall consider the following criteria upon request to alter the Schedule of Parking in Section 7.3.3.5 of the Zoning Bylaw:
 - i. The extent to which the parking design maximizes pedestrian flow to, from and within the development;
 - ii. The extent to which the parking design improves the overall conformance to the design guidelines in Sections 3.3.5.6 – 3.3.5.13;
 - iii. Existing or proposed shared parking agreements;
 - iv. Parking studies, reports or testimony from qualified professionals, indicating the rationale for alternative parking minimums and/or maximums for the USE proposed;
 - v. Existence and or proposed use of inter-lot connections.

- d. *Maximum Parking Space Grouping* – To encourage decentralized parking arrangements, no more than twenty (20) parking spaces shall be grouped together without separation conforming to the parking landscaping requirements in Section 3.3.5.29.

The Planning Board may permit more than twenty parking spaces in one grouping provided that such grouping decreases impacts to abutting residential PARCELS, allows for improved FUNCTIONAL OPEN SPACE, or provides opportunities for streetscape environments to be created along INTERNAL ACCESS DRIVES.

- e. *Parking Accommodations for Mixed Use Facilities* - MIXED USE BUILDINGs, or LOTS which contain more than one USE, are considered mixed-use facilities. In the case of mixed-use facilities, the parking requirements shall be the sum of the requirement calculated separately for each use, so that adequate space shall be provided to accommodate all vehicles anticipated on the premises at any one time. The Planning Board may permit a reduction in the number of parking spaces required where at least one of the following criteria can be met:
 - i. The application demonstrates that the differing USEs proposed have differing peak parking requirements;
 - ii. The application includes proposals for shared parking agreements to manage parking demand.
- f. *Required Off-Street Loading Areas* - One or more off-street loading areas shall be provided for any business that may be regularly serviced by delivery vehicles, including container trucks, SU-30 design vehicles or other similar delivery vehicles. Adequate areas shall be provided to accommodate all delivery vehicles expected at the premises at any one time. Loading areas shall be located at either the side or rear of each BUILDING and shall be designed to avoid traffic conflicts with vehicles using the site or vehicles using adjacent sites.
- g. *Comparable USE Requirement* – Where a USE is not specifically included in the Schedule of Parking, it is intended that the regulations for the most nearly comparable USE specified shall apply. Alternative parking standards to those required in Section 7.3.3.5 may be accepted if the applicant demonstrates to the satisfaction of the Permit Granting Authority (BUILDING INSPECTOR if no special permit or site plan approval is required), or their designee, that such standards are adequate for the intended USE.
- h. *Location of Parking Facilities* – Parking in the LVBD is not intended to be the dominant feature of a proposed site plan. Parking facilities shall be located at the side or rear yard of BUILDINGs, in accordance with the design guidelines in Section 3.3.5.13. Parking facilities shall not be allowed within the required BUILDING setback, unless the following design criteria are met:
 - i. The parking is along an INTERNAL ACCESS DRIVE, designed to resemble on-street parking and/or a pedestrian friendly street frontage for BUILDINGs, including angled or parallel parking;
 - ii. A sidewalk is located between the BUILDING and the INTERNAL ACCESS DRIVE, which meets the sidewalk standards of Section 3.3.5.26.
- i. *Standard Parking Dimensional Regulations* - Parking dimensions shall be designed in accordance with Section 7.5 of the Zoning Bylaw.
- j. *Inter-lot Connections* – Inter-lot connections for vehicles and pedestrians are encouraged to improve connectivity of the District, and to avoid unnecessary vehicles trips to and from Great Road. The Permit Granting Authority may require driveway and walkway connections to abutting LOTS where practicable. Where such connections are not available due to existing conditions on abutting LOTS, the Permit Granting Authority may require amendments to the site plan to allow efficient connections in the future.
- k. *Changes in USE* – Any change to a BUILDING, STRUCTURE or USE, or a change from on permitted USE to another permitted USE shall comply with the requirements of the Schedule of Parking for the entire BUILDING, STRUCTURE or USE as changed.

- l. *Undetermined Uses* – Where the tenants of a BUILDING or USE has not been determined at the time of application for a Building Permit, Special Permit, or Site Plan Approval, the parking requirements applicable to the most intensive use allowed in the district where such undetermined use is to be located shall be considered, however, the number of parking spaces actually built need not exceed the number required by the actual USE or USEs of the BUILDING when established to the satisfaction of the permit granting authority by calculation and/or appropriate condition or covenant in recordable form. In this instance, the applicant is encouraged to consider phasing the construction of parking spaces. The Permit Granting Authority may alter the number of spaces required in accordance with Section 3.3.5.28(c and d).

3.3.5.29 **Perimeter Planting Strip**

Parking lots adjacent to STREETS, sidewalks, paths or INTERNAL ACCESS DRIVES shall include a perimeter planting strip four (4) to seven (7) feet wide. The planting strip shall be protected from vehicular damage through the use of planting beds that may be raised above the surface of the parking lot, through the use of concrete wheel stops, or other measures to ensure that vehicles will not damage the landscaping. The planting strip may include non-opaque fencing, such as iron, or other materials that can provide an attractive, physical separation between the parking, and pedestrian or vehicular passages.

- a. *Shade trees* – Shade trees shall be planted in accordance with Planning Board Rules and Regulations on the same.
- b. Large parking areas (e.g. greater than 20 parking spaces) shall be separated by landscaped islands of eight (8) to ten (10) feet in width.
- c. The exact location of the tree plantings is not specified. Rather, the most appropriate location of plantings shall be considered, including use of plantings to buffer neighboring properties, along the street frontage and pedestrian ways. Trees planted within parking areas shall be planted in protected pervious plots of at least 60 square feet of area.
- d. *Plantings* – Plantings for landscaped areas shall include a mixture of flowering and decorative deciduous and evergreen trees and shrubs and shall be planted with suitable ground cover. Where practicable, native plants and other drought tolerant species shall be utilized to reduce water consumption. Plantings shall be considered in accordance with Planning Board Rules and Regulations on the same.
- e. *Sight Distance* – All landscaping along any STREET shall be placed and maintained so that it will not obstruct sight distance.

ARTICLE 64. Amend Zoning Bylaw Sections 2.3.12 Location of Boundaries of Districts, Section 3.10 Table of Principal Uses, and Section 5.4 Active Adult Neighborhood Overlay District

To see if the Town will vote to amend the Zoning Bylaw by Amending Section 2.3.12 (Location of Boundaries of Districts) consistent with the Active Adult Neighborhood Overlay District Map adopted June 6, 2002 and revised May 13, 2023 which Map is in Appendix D, Section 3.10 (Table of Principal Uses), and Section 5.4 (ACTIVE ADULT NEIGHBORHOOD Overlay District) as indicated in sections A-C of this article; and further that non-substantive changes to the numbering of this bylaw be permitted in order that it be in compliance with the numbering format of the Zoning Bylaw; or to take any other action relative thereto.

Requires 2/3's affirmative vote

(Planning Board)

The Finance Committee recommends APPROVAL of this article. The Planning Board recommends APPROVAL of this article. Passage of this article does NOT increase expenditures.

Since the adoption of amendments to the Active Adult Neighborhood (AAN) Overlay District in October 2021, two items which should be modified in the Zoning Bylaw were brought to the attention of the Planning Board. The first item is a longstanding map error showing a parcel of land identified on Assessor's Map R-2 as Parcel 20-7 to be within the Residential District, but not within the AAN Overlay as had been assumed. In addition, a prohibition on attached garages, considered in an early draft, mistakenly remained within the Zoning Bylaw. This error is intended to be corrected in order to align with the Planning Board's AAN Rules & Regulations.

A) Amend Section 2.3.12 (Location of Boundaries of Districts) to read in its entirety as stated below:

2.3.12 The boundaries of the Active Adult Neighborhood Overlay District are as delineated on a map entitled "Active Adult Neighborhood Overlay District—Town of Stow, Massachusetts" dated ~~May 13, 2002~~ **adopted June 6, 2002 and amended May 13, 2023**, at a scale of 1 inch = 800 feet, on file on the office of the Town Clerk.

B) Amend Section 3.10 (Table of Principal Uses) to read in its entirety as stated below:

ARTICLE 65. Amend Zoning Bylaw Sections 5.4 Active Adult Neighborhood Overlay District, 8.6 Phasing of Growth, and 8.7 Independent Adult Living Residences

To see if the Town will vote to amend the Zoning Bylaw by amending Sections 5.4, 8.6, and 8.7 to read as stated below in sections A, B, and C of this article; and further that non-substantive changes to the numbering of this bylaw be permitted in order that it be in compliance with the numbering format of the Zoning Bylaw; or to take any other action relative thereto. **Requires 2/3's affirmative vote**

(Planning Board)

The Finance Committee recommends APPROVAL of this article. The Planning Board recommends APPROVAL of this article. Passage of this article does NOT increase expenditures.

The Planning Board recommends deletion of the Phasing of Growth bylaw, as it would not hold up to legal review, has never resulted in slowing the rate of development in Stow, and blocks the Town from accessing specific grant funds through the State. Although the Phasing of Growth bylaw was adopted in 1988 during a period of rapid growth, even the largest housing developments in Stow have not triggered the need for phasing of growth as outlined in the bylaw. The Planning Board recognizes there are large developments on the horizon, yet as a Comprehensive Permit, the developer of Stow Acres could reasonably request a waiver from this bylaw and Active Adult Neighborhoods such as The Cottages at Wandering Pond off Athens Street are already exempted under the current Zoning Bylaw. The inclusion of a Phased Growth bylaw has previously disqualified Stow from Housing Choice Designation, which would allow Stow to become eligible for capital grants through the Department of Housing and Community Development.

A) Amend Section 5.4 by deleting section 5.4.21:

~~5.4.21 — ACTIVE ADULT NEIGHBORHOODS constructed under a Special Permit issued in accordance with this Section are exempt from Section 8.6, Phasing of Growth.~~

B) Delete Section 8.6 in its entirety:

~~8.6 — Phasing of Growth~~

~~Over the past decade, the Town of Stow has been subject to extensive growth that has strained its ability to govern. With this point in mind, the purpose of this Section is to ensure that future growth occurs in an orderly and planned~~

manner that allows the Town time for preparation to maintain high quality municipal services for an expanded residential population while allowing a reasonable amount of additional residential growth during those preparations. The citizens of Stow insist on, take pride in, and enjoy a reputation for such high quality and reliable municipal services. Several key municipal services, including human services and schools, are currently or may soon be under considerable strain. This Section will relate the timing of residential development to the Town's ability to provide services.

In addition, this Section also proposes to encourage certain types of residential growth which reflect the values of the Town as previously expressed in its policies and appropriations.

8.6.1 — Regulations:

8.6.1.1 — Beginning on the effective date of this Section, no building permit for construction of projects involving four or more residential units shall be issued unless in accordance with the regulations of this Section.

8.6.1.2 — DWELLING UNITS shall be considered as part of a single development if located either on a single parcel or contiguous parcels of land which have been in the same ownership at any time subsequent to the date of adoption of this Section.

8.6.1.3 — All newly authorized residential units for which individual or several building permits have been issued pursuant to the Massachusetts State Building Code, 780 CMR shall count toward the growth rate limit of 35 DWELLING UNITS defined in Section 8.6.2.1 of the Zoning Bylaw.

8.6.2 — Planned Growth Rate

Beginning on this date of adoption, the applicable permit granting authority (Planning Board, Zoning Board of Appeals or BUILDING INSPECTOR) shall not approve any residential development which would result in authorizations for more than 35 DWELLING UNITS over a 730 consecutive day (two year) period unless (a) specifically exempted (the project has less than four residential units); or (b) it is duly authorized in a development schedule.

8.6.2.2 — Once a development schedule is approved, building permits shall be issued in conformity with that schedule. Once authorized by the development schedule, said building permits shall be issued even if the 35 unit limit has been reached.

8.6.3 — Development Schedule — Building permits for new DWELLING UNITS shall be authorized only in accordance with the following schedule:

- 5.5.9.1 The Planning Board shall consider the recommendation of the Board of Health, the Conservation Commission, the Town’s consulting engineer, and other Boards, Departments and agents, in making said findings.
- 5.5.9.2 The Planning Board may require changes to the “REGISTERED MARIJUANA ESTABLISHMENT Site Plan” and impose additional conditions, safeguards and limitations, as it deems necessary, to secure the objectives of this Bylaw.
- 5.5.10 Severability - If any provision of this Section or the application of any such provision to any person or circumstance shall be held invalid, or the application of those provisions to persons or circumstances other than those to which it is held invalid, the remaining provisions of this Zoning Bylaw shall not be affected thereby, and to this end the provisions of this Zoning Bylaw are severable.

ARTICLE 67. Amend Zoning Bylaw Section 3.3 Business District Uses

To see if the Town will vote to amend the Stow Zoning Bylaw by deleting existing section 3.3.2.4 and substituting the following therefor, thus adding to the uses permitted in the business district, subject to special permit granted by the Planning Board:

3.3.2.4 Restaurants or other places serving food within the BUILDING, or offered through accessory outdoor service on a patio of seating area. Also included is an establishment whose principal or ancillary method of operation includes sale of food and beverages for take out in paper, plastic, or other disposable containers, or other disposable containers, or where food and beverages are served directly to the customer in a motor vehicle.

Requires 2/3's affirmative vote (Citizen’s Petition)

The Finance Committee will make a recommendation on this article at Town Meeting. The Planning Board DOES NOT recommend approval of this article. Passage of this article does NOT increase expenditures.

ARTICLE 68. Amend the Lower Village Business District Zoning Boundary to Exclude the Residential Property at 196 Great Road

To see if the Town will vote to amend the Zoning Boundary of the Lower Village Business District by excluding the historical residential property at 196 Great Road from its current zoning within the Business District and including it in the Residential District, or to take any other action relative thereto. **Requires 2/3's affirmative vote**

(Leigh Hilderbrandt – Property Owner)

The Finance Committee will make a recommendation on this article at Town Meeting. The Planning Board recommends APPROVAL of this article. Passage of this article does NOT increase expenditures.

Under Section 3 of the Zoning Bylaw - Use Regulations, 3.2, “The Residential District is intended as a district for typical rural, single-family residential and non-commercial uses” and 3.3 “The Business District is intended to meet local needs for retail goods and services primarily within a BUILDING.” 196 Great Road is a single-family residential home that has continually served as a residential dwelling for over 300 years. It is of historical and cultural significance to the Town of Stow and contains secondary conservation resources, including a historic stone wall and steep slope. This unique First Period Colonial home contributes to the rich variety of Great Road’s historic streetscape. Amending the southwest zoning boundary of the Lower Village Business District from the western property line of 196 Great Road to the eastern property line will place the historical, single-family residential property within the Residential District, thereby matching the current and continued use of the property to the intended use regulation of the Residential District, as well as match the zoning of the neighboring residential properties, while also providing a more clear delineation of the Residential District and separation from the Business District.

CONSENT CALENDAR PROCEDURES

Each year there are a number of warrant articles, for which past experience suggests that the **action will be routine, non-controversial and predictable**. Again at this annual meeting, these articles have been selected for inclusion in the Consent Calendar. The use of the Consent Calendar speeds the passage of warrant articles which the Select Board and Moderator, in consultation with Town Counsel and the Finance Committee, believe should generate no controversy and can be properly voted without debate.

The consent calendar will be taken up as one of the first orders of business at the Annual Town Meeting.

There will be a motion to take all of the Consent Calendar articles identified in the warrant and **act upon these as a group by a single brief affirmative main motion**, referred to as the Consent Calendar, which will also contain separate and specific motions for each such article included in the Consent Calendar. The language and the amount of money specified in the Consent Calendar articles as printed in the warrant are subject to change. The motion made at Town Meeting will include any changes.

At the motion of the Consent Calendar, the Moderator will call out the number of each of the articles, one by one. If any voter has doubt about passing any motion or wishes an explanation of any article included in the Consent Calendar, the voter should say the word **“Hold”** in a loud voice when the article number is called by the Moderator.

The Moderator will then inquire as to whether the request to hold is for a question or for debate. If the purpose of the request is merely to ask a question, an attempt to obtain a satisfactory answer will be made, and if this occurs the article will remain on the Consent Calendar. If the purpose of the request is to hold the article for debate, the article will be dropped from the Consent Calendar and restored to its original place in the warrant, to be brought up, debated, and voted on in the usual way. It is hoped that voters will remove articles from the Consent Calendar only in cases of genuine concern.

After calling the individual articles on the Consent Calendar, the Moderator will ask that all articles remaining be **passed as a unit** by a unanimous vote after a brief affirmative main motion is made inclusive of all articles remaining on the Consent Calendar.

Before Town Meeting, please review the Consent Calendar articles. The articles begin after Article 5 and are marked **“(CONSENT CALENDAR)”** in the upper right-hand corner of the article. Please do your homework before coming to Town Meeting. If you have any questions about the articles included in the Consent Calendar, motion or procedures, please feel free to call the Town Administrator (978-897-2927) **before Town Meeting**.

CONSENT CALENDAR MOTION

Move that the Annual Town Meeting take action on Articles 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, and 36 as printed in the warrant, without debate on any such articles, and provided that upon the request of any voter at this meeting made before the vote is taken on this motion, an article shall be dropped from the Consent Calendar and shall be acted upon in the ordinary course and order of business at this Town Meeting.
